About This Game

Pereulok: The Series is an intricate adventure in the open world, and only few lovers of non-ordinary stories can disentangle these issues. The action takes place in 1901 in a small alley – pereulok – in the southern city of the Russian Empire. You will have to play for one of the three inhabitants of that alley. They live here a long time, they know everyone here. But small communities always conceal the unexpected.

In the first episode low-ranking clerk simply wants to rest on a day off, but a longtime companion gets the hero into solving his own problems, sending him for an unfortunate son. You will find yourself in the atmosphere of newsreels of the beginning of the XX century, among the historically authentic situation. Events are based on real historical facts.

Russian literature. The plot of **Pereulok: The Series** was based on the stories and characters described in Russian classics. Here you will find Dostoevsky, Bulgakov, Tolstoy. You will find yourself among the filth and vices of those years.

Show a bad character. Decisions affect the fate of the main character of the episode, seriously affect the future of other residents of the alley. Don't believe anyone! Even an old friend may wish evil ... or good, which later will be even worse.

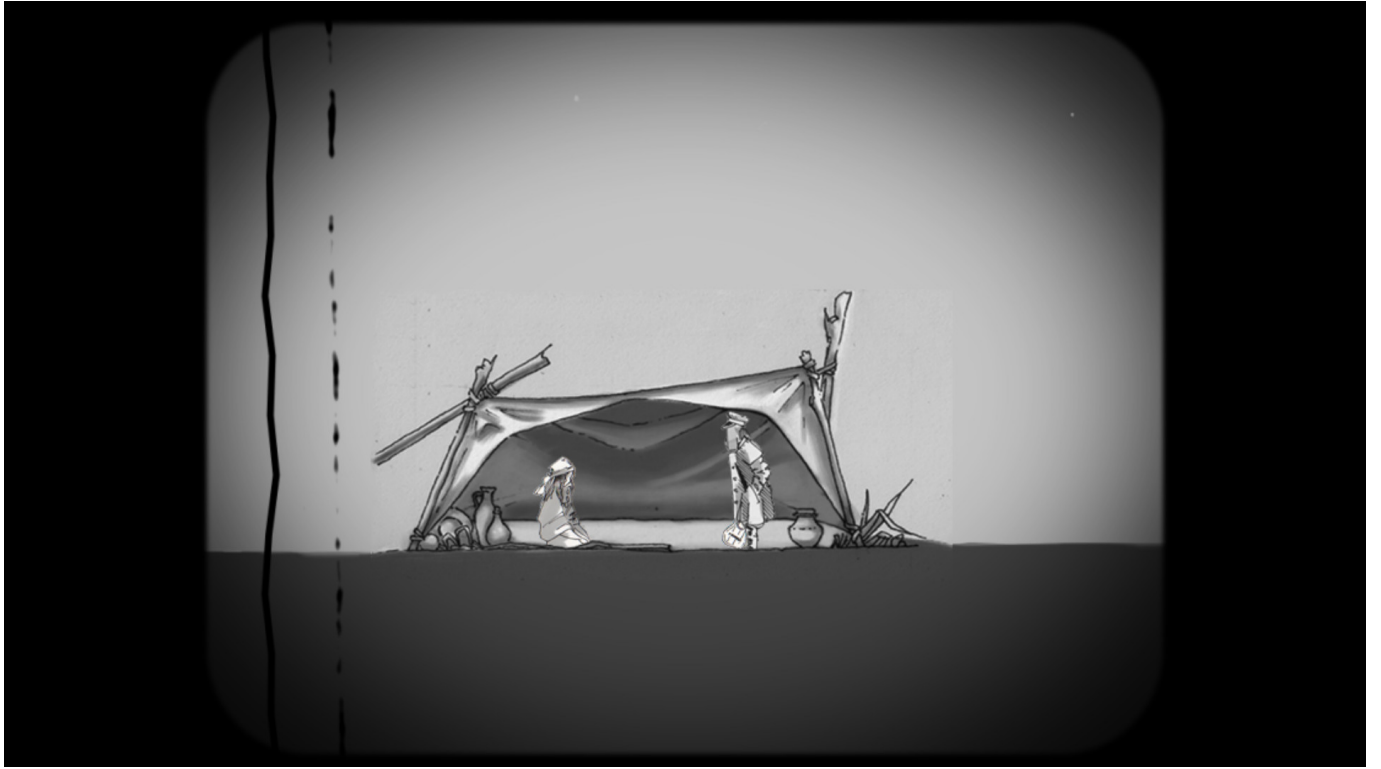

The entangled plot – all is done to ensure that the motivations of the alley residents are not clear at first sight. Truth does not lie on the surface.

Trendy soundtrack – instruments and sounding correspond to the historical realities of the beginning of the 20th century.

pereulok the series

I don't know what to think of this game, I can tell you that the art style's something I do like and the music's quite good too, then there's the rest...

It's basically a point'n'click in which you're being told a story by the characters rather than combine assorted things to progress through the game and this is the major problem with it; the translation is quite horrible which isn't a good thing for a story based game...

I laughed like hell playing the first part of the story and I'm sure I'll love playing the upcoming two as well but that is due to me loving so called "Turkeys" - like "Black Samurai" but if you're looking for a good game (at least in english translation, in it's original language it may be good) this is not it, if you're like me you may still have quite a lot of laughs for the price. :) (be aware that finishing the first storyline - Ivan - only took me about 30 mins and this was with me reading most of the text out loud as I was recording it...)

So, basically, stay away unless you're as weird as I am...
