I would like to like the game since it looks like they streamlined the gameplay and updated it a bit from when it was just The Secret World, but I'm crashing at every cut-scene and loading page and it seems I'm not the only one.. It has the old writing that made Funcom great , expect mistery and fun quirks all over the place. You solve super natural problems with guns and reading the bible 10V10. "Now that's one big pile of

Dr. Ian Malcolm. I loved this game, like everyone else. I was late coming in, but enjoyed the fringe pieces I played.

My problem? They cancelled my account right before their huge update\transition.

When I asked why, they said I had declined payment and had owed them 3 months back pay (subscrip. for pre-SWL). The worst part? My bank statement said otherwise--with charges made right up until the cancellation.

Seriously, that was a load of , and I was relieved to find I wasn't the only one who experienced this, but sorry for those who did.. give me your money instead.. The old Secret World was pretty good before they turned it into Secret Worlds Legends. It doesn't have the same feel anymore.. Highly Recommend

Pros:

- 1) Story is one of the best in an MMORPG.
- 2) This is a thinker's MMORPG. The puzzle missions are no joke and the solutions span all of humanity's history.
- 3) Game blends real life with the game, for instance, see a dead guy? No idea what to do? Google his business card. The game has websites set up just for missions in this game. The blurred reality is really fun.
- 4) Unique MMORPG. Most nowadays don't take place in modern day with modern locations. This game feels like Assassin's Creed in the connection to humanity but takes our lore to a whole new level.

Cons:

- 1) Game feels like the Devs don't care about it. They spent their dollars earned from the Secret World on a new game (basically Secret World: Mars), which makes me feel like they shelved this game. Really wish they would focus on new content.. DLC prices.. YOU FUNCOM. Ruined game. Best story driven MMO out there. Also best crash simulator out there too. Second also goes free = users who paid for the game lost everything. Third also goes free = actually devs manages to make the game WORSE. From my 300 hundred game library this game is the most bugged and crashing simulator out of them all.

EDIT: Actually let me change it. If i could review this game in one sentence it would be this. "You ll sooner crash than find party for dungeon in this game :))))" This says it all.
